Artist Tiffany Parbs' work is all about the body and changing the body and artist Lily Mae Martin's works are about looking at the body in a new way.

## What is your favourite body part? Why do you like it so much?

It could be your fingers because you like to draw, or your foot which is great at kicking a ball. It could be that you like a particular tooth or the colour of your hair, whatever it is, write or draw about it.
