

CONSTRUCTION UPDATE

SPRINGVALE BOULEVARD PROJECT
MARCH 2022

The Springvale Boulevard Project will see a full upgrade of the road and footpaths located on Springvale Road between Balmoral Avenue and Windsor Avenue.

What we've done so far

Since our last update we have:

- Completed stage 2 drainage works
- Completed structural soil, which will help drainage for the new garden beds
- Started roadside kerb installation
- Started public lighting works

Construction impacts

Moving into Stage 3 of the project, we are progressing with earthworks. These works create dust and increase noise. We are monitoring our dust levels and have started implementing water trucks that reduce dust levels to help mitigate the impact to the community.

We apologise for any inconvenience and will continue to minimise these impacts as much as possible.

Changed traffic conditions

During the works there will be changes to traffic conditions, with two lanes maintained in each direction. Please be aware and look out for signage and traffic controllers.

Working hours

Most of our works in March will be day works and undertaken between 7am and 5.30pm, Monday to Friday.

Occasionally, night works will take place between 6pm and 6am, Sunday to Thursday. We will notify you ahead of any night works that need to occur.

Parking

Parking bays along Springvale Road will be temporarily unavailable to allow the project team to conduct works safely.

Parking is available at the 'Number 8' Balmoral Avenue multi-deck car park and Windsor Avenue car park.

Asbestos works

As we progress with the Springvale Boulevard Project, we may uncover asbestos-containing materials that need to be removed. We'll keep you informed and follow strict guidelines for asbestos removal if we do.

It is common to find asbestos in infrastructure projects. The asbestos found is usually non-friable, commonly found in building materials such as concrete and produced in a bonded state. This means it cannot be crushed by hand and poses a low risk.

When asbestos is found, to carry out these works safely, we will engage a licensed asbestos removalist to remove the asbestos from site. Due to asbestos management regulations, workers handling the material must wear protective clothing regardless of the level of risk involved.

Keeping you informed

We will continue to distribute regular construction updates to impacted traders, business owners and residents in the area to keep you up to date as construction progresses.

Contact us

For construction related enquiries, please contact the MACA team on **1300 348 040** or **(03) 8373 4040**.

For any general enquiries about the project, please contact the City of Greater Dandenong on **(03) 8571 1000** or email **SpringvaleBoulevard@cgd.vic.gov.au** for more information.
