

CONSTRUCTION UPDATE

SPRINGVALE BOULEVARD PROJECT
APRIL 2022

The Springvale Boulevard Project will see a full upgrade of the road and footpaths located on Springvale Road between Balmoral Avenue and Windsor Avenue.

What we've done so far

Since our last update we have:

- Removed the existing footpath on eastern side of Springvale Road
- Continued roadside kerb installation, with the eastern side of Springvale Road near completion
- Installed electrical, communications and traffic infrastructure
- Finalised public lighting infrastructure works.

Changed traffic conditions

During the works there will be changes to traffic conditions, with two lanes maintained in each direction.

At certain times we may need to close one lane to allow our works to occur safely. Please be aware and look out for signage and traffic controllers.

What is coming up

In April we will:

- Construct the concrete base at Post Office Lane and Windsor Avenue, works planned for Tuesday 12 April
- Start installing designed pavers at Post Office Lane and Windsor Avenue, works planned to begin on Wednesday 13 April and continue for two weeks
- Remove current footpath on western side of Springvale Road, works expected to begin on Tuesday 19 April, these works will involve a combination of day and night shifts to reduce impacts on traders
- Prepare and install roadside kerb along western side of Springvale Road, expected to start at the same time the footpath is being removed
- Finalise electrical, communications and traffic infrastructure
- Begin to install street furniture, including new street chairs.

Asbestos works

As we progress with the Springvale Boulevard Project, we may uncover asbestos-containing materials that need to be removed. We'll follow strict guidelines for asbestos removal if we do.

It is common to find asbestos in infrastructure projects. The asbestos found is usually non-friable, commonly found in building materials such as concrete and produced in a bonded state. This means it cannot be crushed by hand and poses a low risk.

When asbestos is found, to carry out these works safely, we will engage a licensed asbestos removalist to remove the asbestos from site. Due to asbestos management regulations, workers handling the material must wear protective clothing regardless of the level of risk involved.

Construction impacts

Moving into Stage 3 of the project, we are progressing with earthworks. These works create dust and increase noise. We are monitoring our dust levels and have started implementing water trucks to reduce dust levels to help mitigate the impact to the community.

We apologise for any inconvenience and will continue to minimise these impacts as much as possible.

Working hours

Most of our works in April will be day works and undertaken between 7am and 5.30pm, Monday to Friday.

Occasionally, night works will take place between 6pm and 6am, Sunday to Thursday. We will notify you ahead of any night works that need to occur.

Keeping you informed

We will continue to distribute regular construction updates to impacted traders, business owners and residents in the area to keep you up to date as construction progresses.

Contact us

For construction related enquiries, please contact the MACA team on **1300 348 040** or **(03) 8373 4040**.

For any general enquiries about the project, please contact the City of Greater Dandenong on **(03) 8571 1000** or email **SpringvaleBoulevard@cgd.vic.gov.au** for more information.
