

### Leonard Avenue Streetscape Revitalisation Project

Project Bulletin #2

June 2023

The Leonard Avenue Streetscape Renewal Project has commenced, and Planned Construction Group (PCG) have set up on site starting works on the eastern end of the street. PCG have set their work site at the rear of shops to minimise the impact on customer car parking.

We appreciate feedback received to date, it has enabled Council to continue to make improvements to shop front access during the Leonard Avenue Streetscape Revitalisation Project. Specifically, Council has implemented the following:

- Installed three access ramps to the Buckley Laneway Car Park and entrance to Chemist Warehouse.
- The Car Spaces adjacent to Chemist Warehouse have been changed to ½ P for the duration of the project.
- Installed 2 VMS sign boards informing customers that stores are open for business.

We look forward to enjoying the renewed streetscape when works are completed at end July, strengthening the distinctive character of the village shopping experience in Noble Park, whilst providing increased plantings, seating, and renewed lighting and footpaths.

#### **Business Considerations**

We will continue to endeavour to make every effort to minimise construction inconveniences when pavement sections are built. Pedestrian access to shop entrances will be maintained during all construction phases and any major disruptive works will be scheduled outside of normal operating hours where possible. Some on-street parking will be temporarily closed due to the construction.

# Noble Park Activity Centre

## Bulletin

It is requested that you continue to:

- Maintain normal operating hours as this contributes to the street feeling open for business
- Remain positive about the work when talking to your customers and suppliers, remember negative impressions can be hard to reverse when works are complete
- Consider the long-term outcome and benefit of an improved streetscape for your business and pedestrians
- Contact Council with day-to-day concerns so we can resolve them quickly

### Contact Details
